

Lashing Shade Ring

2 0 2 1

HM-6SDR-0550 & HM-6SDR-0970
AUST REG DESIGN 202014708

Made from 316 grade stainless steel the hamma® lashing shade ring features an electro polish surface finish.

Designed in consultation with shade sail manufacturers, the hamma® lashing shade ring supports the latest methods of fixings and works with a broad range of stainless steel wire ropes enabling shade sail manufacturers to minimize inventory holdings.

KEY DESIGN FEATURES

- Multiple options for fixing to roof eye-bolts and post eye-bolts
- Supports shackle or fork connection with a maximum pin size of up to 12.0mm
- Can be easily lashed with VB or sash cord
- HM-6SDR-0550 fits 3.0mm, 3.2mm, 4.0mm stainless steel wire rope
- HM-6SDR-0970 fits 5.0mm, 6.0mm stainless steel wire rope
- Tested MBL of 33.591kN or 3.37 tonne

LASHING

The two shoulders in the head design allow for smooth lashing. This enables quick and easy lashing tension whilst giving a central pivot point when using shackle or fork/pin attachment, or a combination of both at installation. This process uses the shoulders to tension in the sail clew before fixing off with a shackle or fork connection.
