

IT'S DOWN TO THE WIRE®

# Quality wire rope cable assembly and manufacturing

Saving customers time and money, our quality assured, competitively priced manufacturing services deliver cable assemblies to meet the most demanding specifications

Available from Arcus Wire Group - leading supplier of galvanised and stainless steel wire ropes and fittings.

2 0 2 3

## Two Manufacturing Facilities

- Supporting customers Australia-wide, our two fully equipped manufacturing facilities are located in New South Wales and Queensland.

## Expert Team

- Our expert team has a combined total of 65 years experience in cable assembly and are fully trained on all cable assembly equipment.

## Quality Assured

- Our cables can be tested to the highest industry standards using our in-house 60t and 300t Test Beds. Cable assembly projects can be delivered with proof and destructive testing certificates

## Fast Turnaround

- Both manufacturing locations are fully stocked with galvanised and stainless steel wire ropes and fittings, enabling our expert team to deliver fast turnarounds from order through to manufacturing and testing.

## Projects of Any Size or Specification

- We deliver cable assembly projects from small-scale yacht rigs and balustrading through to large-scale projects for high volume cable production (in the thousands) as well as cable assemblies for the heaviest stainless steel Duplex projects.

# Quality wire rope cable assembly and manufacturing

Delivering cable assemblies to meet the most demanding project specifications whilst saving customers valuable time and money

## Giving you confidence

Our quality manufacturing services provide customers with confidence that our cable assemblies will meet the most demanding project specifications. All cables are delivered with a test certificate providing proof of performance.

## Saving you time and money

By engaging our quality manufacturing services, customers save money by removing the need to purchase high-cost wire cutting and swaging equipment AND customers save time by not having to spend valuable hours swaging cables.

## Cable Assembly

Our two manufacturing facilities are fully equipped with the following equipment:

- **Vertical Presses** – We have a total of four vertical presses in operation at our manufacturing facilities ranging from 25t to 500t.
- **Roll Swaging Machines** – Our manufacturing facilities are equipped with multiple Wiretechnik roll swagers from the entry level A100 to the high capacity A500. Our Roll Swaging Machines can swage wire sizes 1mm to 40mm.
- **Automatic Cutting Machines** – Our in-house Talurit LKA 28 PS is a fully automatic cutting machine capable of cutting wire ropes from 5mm to 28 mm.
